PROFESSIONAL SUMMARY

MCA student with a B.Sc. in Mathematics and hands-on full-stack and backend development experience. Built AptitudePro, a database-driven application with authentication, quiz-evaluation logic, and progress tracking using Node.js, Express.js, MongoDB, and Mongoose, and implemented REST APIs with Django REST Framework, MySQL, and Postman testing. Bring analytical, quantitative problem-solving and a strong interest in practical AI applications, automation, data infrastructure, and business-focused software.

TECHNICAL SKILLS

Backend and APIs: Python, Django, Django REST Framework, Node.js, Express.js, REST APIs

Databases and Data: MongoDB, Mongoose, MySQL, SQL, Database Schema Design, Data Modeling

Frontend: JavaScript, HTML5, CSS3, EJS

Development Tools: Git, GitHub, Visual Studio Code, Postman

CS Fundamentals: Object-Oriented Programming, DBMS, Data Structures, Java

PROJECTS

AptitudePro — Gamified Aptitude Practice Platform

Node.js, Express.js, MongoDB, Mongoose, EJS, JavaScript, HTML5, CSS3, sql.js

- Built a full-stack aptitude practice platform for placement preparation with 195 levels across 9 tiers, timed quizzes, and company-specific tracks for TCS, Infosys, and Wipro, delivering features end to end from EJS views to the database.
- Designed MongoDB and Mongoose data models for users, questions, results, section progress, user statistics, and XP history; stored answer snapshots to preserve historical attempts and maintain data integrity when questions change.
- Implemented session-based authentication with bcryptjs password hashing, express-validator input validation, user/admin role-based route protection, and Helmet security headers.
- Developed quiz evaluation, XP and level services, and progress tracking (score, accuracy, time taken, question-by-question review); integrated an in-browser SQL practice console using sql.js.

INTERNSHIP EXPERIENCE

Full Stack Development Intern

Faith Infotech, Kerala | *One-week internship*

- Implemented Python backend and REST API workflows using Django REST Framework, covering request handling and integration between application components.
- Worked with MySQL alongside Django REST Framework in the application backend.
- Tested API endpoints with Postman to validate request and response behavior.

EDUCATION

Master of Computer Applications (MCA)

MACFAST, Thiruvalla, Kerala

2025–2027 (Expected) | Semester 1 CGPA: 8.72/10 | Semester 2 CGPA: 8.39/10

B.Sc. Mathematics

Catholicate College, Pathanamthitta, Kerala

2022–2025

CERTIFICATIONS

- AWS Data Analytics_FSP — Gold (100/100), NASSCOM / IT-ITeS Sector Skills Council competency assessment | September 2026
- Data Analytics with Python — NPTEL SWAYAM
